# POWER AND THE ENGINEER

## INDEX FOR VOLUME XXXII, PART I

### JANUARY 1 TO JUNE 30, 1910

EXPLANATORY NOTE.

Illustrated articles are marked with an asterisk (*). Book notices are denoted by a dagger (†). Cross references to a particular initial word may apply to any cognate word beginning in the same way. Thus, a reference from "Oil" to "Lubricant" would relate equally to "Lubricating," "Lubrication" or "Lubricator." The cross references condense the matter and assist the reader, but are not to be regarded as conclusive. So, if there were a reference from "Boiler" to "Furnace" and if the searcher failed to find the required article under the latter entry, he should not regard it as useless to turn back and look through all the "Boiler" entries, or others that the topic might suggest, as he would have done had there been no cross reference. Letters are indexed under title or subject, general articles under writer's name as well. Not all articles relating to a given topic necessarily appear under the same entries.

Air-compressor capacity, Price. 452
Air-compressor check valve. Harvey. 88
Air compressor, Corliss, Modern type. Rice. *780
Air-compressor cylinder ratios. Redfield. *1070
Air-compressor experience. Dreyer. 859
Air-compressor motor, Felten-Guilleaume. *760
Air compressors, Volumetric efficiency. H. S. P. 563
Air-compressor horsepower and area of segment. T. E. H. 563
Air excess, Tax from. Westover. 233
Air excluders for economizers. *240
Air lift, Information desired. Beaton. *1126
Air-pressure regulator. Beaton. *46
Air pump and jet condenser, Twin vertical, Blake. *60
Air pump, Power required. J. B. 785
Air pumps, English. Seager. *732
Air supply, Boiler furnaces. Bailey. 414, *513
Air tank, How long will engine run from? H. O. 468
Alarm. See also "High and low water," "Signaling," "Over-winding," "Oil."
Alarm against wrong motor starting. Fenkhausen. *807
Alarm, Telephone whistle. Warren. *1127
